Features Autocad is used to create 2D and 3D drawings. By combining several of its built-in drawing tools, the user can create complex objects. These can be further manipulated using the extensive tools built into Autocad or programs such as Adobe Illustrator, Photoshop, Adobe Flash or Flash Catalyst, QuarkXpress, CorelDRAW, CadSoft Draw, AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D, Autodesk Drawing Assistant, Autodesk Revit, AutoCAD Web App, Autodesk DWF Viewer, Autodesk Fusion 360, and others. Autocad also provides capability for 3D modeling in its version known as AutoCAD LT, which is used for architectural and engineering-related work, but not structural work. Geospatial data can be automatically loaded into AutoCAD models. This requires a license for the Autodesk Project 2009 add-on product. Enterprise configuration Autocad has a strong configuration system and a robust version control and deployment system. In 2015 Autodesk integrated a new configuration system into the tool, allowing for faster and more efficient management of settings in your drawing environment. Autocad is available for computers running Windows, macOS and Linux and Autocad LT is available for 32-bit (x86) and 64-bit (x64) computers running Windows 2000 or later. Autocad LT 32-bit versions are based on Autocad 2010 and are compatible with the 2010–2018 versions of Autocad LT. Autocad LT 64-bit versions are based on Autocad LT 2010 and are compatible with the 2010–2018 versions of Autocad LT. Autocad LT 64-bit is the newest version available on Autodesk Exchange Apps. Autocad LT is also available for iPad (version 4.5 or later). Licensing The price of Autodesk AutoCAD is based on the edition of the software, the number of users and the number of seat licenses. AutoCAD is available as a free trial that allows users to run the software in a non-production environment for up to 30 days. This is called a test mode. AutoCAD is available as a stand-alone product (i.e., one license for each user), a stand-alone service (i.e., one license for multiple users), or
