World Cup 2006 Soccer Follow all the action as Germany competes in the FIFA World Cup 2006. Germany 2006 has all the features and statistics that World Cup Fans have come to expect from a Soccer Game. Germany 2006 includes the following features: Match Schedule: The Netherlands, Italy, Argentina, Spain and Holland are all being read to play matches. The first round of matches will begin on June 11 and end on June 24th with the second round of matches beginning on June 25th and ending on July 4th. The final match will be held on July 9th. Team vs Team Matches: Players for both the Brazil and England national soccer teams will be available for your game during the 2006 World Cup. In addition, up to sixteen computer controlled nations teams can be controlled in a typical team vs team match. Match Results: Results are manually entered into the game. The results of matches can be viewed after a match has been finished and then printed out. Results can be saved to the game and exported. Statistics: Statistics are displayed during play for both teams and all of the relevant statistics can be manually edited. Match Schedule: The tournament started on June 11th and will continue until July 9th. The games of each team are clickable. You can view the players and their names, and you can look at the rest of the teams playing the same day. Team vs Team Matches: At the beginning of each game the computer controlled teams will be chosen. After the computer controlled teams are set you will then be able to set the control characters and their player faces. The computer controlled teams can have up to four players of a certain team. Tournaments: The game can be used to simulate the group stages of a tournament. The computer will automatically be setup to use its players during a tournament based upon the group they were placed in. If the computer and you don't have the same number of players there will be up to four computers controlling the teams (face off). Drawing: Each game of a tournament is drawn for. You will be able to ask for a random draw or you can specify a time of day and/or date that the tournament will be drawn. The drawing will produce two matches for you with the second game being drawn for afterwards. The computer controlled teams will be displayed during the draw. The camera will automatically follow the movements of the computer controlled teams. If the camera is moved too far it will automatically return.

The match results can be viewed with the following format: Team name: Score|Score|Goal If a match is drawn, the team that scored more goals than the other team wins. If two or more teams have the same score after match in a group, the ranking of teams in the group is evaluated in the following order: 1. The winner of match between teams 2. The ranking of teams in the FIFA World Ranking if higher 3. The ranking of teams in the FIFA World Ranking if lower The ranking of teams in the group cannot be disputed. Teams that finished on the same points will be identified with the same number. If a team wins more points than the other team, the higher number will be placed first. If a team loses more points than the other team, the lower number will be placed first. If your application sends signals, they will be automatically converted to plain text and sent to your server, where they will be stored with the record. This allows you to use new technologies (like RSS) or simple distributed systems for managing your correspondence. Player Name: M.Manger, M.Heitinga Team Name: Brazil Date: 06.02.2006 Groups: Group A What is new in this release: The integrated calendar allows to view the upcoming matches for each team and for every group. The match statistics allow to view the results for all matches, by group, by round, by team or by a specific team. This version provides a rest API to communicate with the server 2005-2011 : Performances 2004 : 2003 : Thanks : Changes since UMF_20060120 : v 2.0 New report functionality : -Now you can show the match statistics when you need -Now reports can be saved, viewed and sent using the new REST based API -First version of the REST based API is available via see the HELP section of the menu New display interface : - Now the graphic interface is customizable. You can export all necessary graphics formats for the match schedule, the match report and the report of the results (called in PDF and CSV formats). 09e8f5149f
