ABSOLUTELY FREE! - Never pay for software, but please support this site! **SAMSUNG Laptop to Hotspot Converter - preview SAMSUNG Laptop to Hotspot Converter - download mirrors** The application requires the newest version of Java Runtime Environment, which is freely available for download at the official website. Furthermore, in order to run the application, you will need to download and install the setup file from the mirrors. The file

is usually around 835 MB in size. As the application requires the compatibility with Windows XP and lower, please make sure that your operating system is at least of Windows 7, Vista, Windows 8 or Windows 8.1. Alternatively, you can install the software on your USB flash drive. First, download and install the application to the USB flash drive, and then insert it into the laptop you want to use as a hotspot. The application then runs from the drive and the setup file is downloaded from the software and

installed automatically. The software is protected and you will not be able to install it on an unauthorized device. Additionally, as it is an authorized download, the software can only be run on Samsung laptops. The application does not contain any form of adware, which may slow down the computer. Furthermore, it is absolutely free and contains only advertising related to wireless network drivers. SAMSUNG Laptop to Hotspot Converter - supported platforms The software

runs on the following platforms:
Windows XP Windows 7 Windows
8 Windows 8.1 Windows 10
SAMSUNG Laptop to Hotspot

What's New In SAMSUNG Laptop To Hotspot Converter?

Newest version of SAMSUNG Laptop to Hotspot Converter brings more convenience and new possibilities: 1. Easier connection procedure: SAMSUNG Laptop to

Hotspot Converter makes easier to get connected to wireless network (when hotspot is enabled) and share Internet connection to other devices. You can select "Use your own network name" to create your own hotspot name for connecting your laptop to network and share your Internet connection. After setting network name, SAMSUNG Laptop to Hotspot Converter will make the hotspot invisible on network, so it won't be discovered by network scanner. 2. Open access on any location: Hotspot shows what

devices are connected to it and is available for everybody to connect to. You can use your own name or hotspot name to limit access on specific Wi-Fi network. You can use the password of your network to secure the connection from any unwanted devices. You can make the password strength stronger, use unknown, any or even random character. 3. More features added: There are more features in the latest version of SAMSUNG Laptop to Hotspot Converter, including: o Help function added: You can get

some help when you are using hotspot. You can ask "Why am I not connected to my hotspot? What's the problem? How can I solve this problem? How to set up network name? How to set up hotspot password? How to configure Wi-Fi hotspot?"

- o Device scanning: Find your device's MAC address before connecting to hotspot. You can find the MAC address of any device you are currently using, including: Wi-Fi enabled devices, printers, multimedia devices and others. You can check the MAC address as soon

as you connect your laptop to hotspot.

- o Hotspot mode added: Now SAMSUNG Laptop to Hotspot Converter can switch between the hotspot mode and ad-hoc mode.
- o Hide from network scanner: In hotspot mode, hotspot is invisible on network.
- o Select to be client or server: In hotspot mode, SAMSUNG Laptop to Hotspot Converter can be a client to access the Internet, or a server to share the Internet connection.
- o Small memory footprint: The application is very small. If your laptop cannot

connect to hotspot, you can choose to disable hotspot, so you can connect to it later. There won't be any impact to the performance

System Requirements For SAMSUNG Laptop To Hotspot Converter:

**Minimum Specifications: OS:
Windows XP SP3 CPU: 2x Intel®
Core™ 2 Duo CPU or faster
