With more than 10 million downloads since its first release, Clip Plus 1.5 is a Windows based application designed to monitor the clipboard and store all the copied links, text and images. The most useful Windows features are now available on the Apple iPhone and iPod Touch: a built-in web browser, a weather forecast service and support for voice calls. You can store up to 10 items in your clipboard in a categorized list, so that they are easy to find. You can even record the content of the clipboard, and filter it by subject. With more than 500 topics, you can now find the information you are looking for quickly. You can even customize your site templates for the registered accounts. The database is updated automatically, and notifications are issued every day to let you know if there are new entries. The integrated weather and time prediction helps you find the information you need quickly, whether you are looking for a report from an online source, or a flyer from a billboard. The "Push to Talk" button turns your iPhone into a walkie-talkie, and calls can be answered right away. Customer Support We are here to help you with your problems.
