Soft Wind: The Dark Wind - A Brief History: For years, the Dark Wind, one of Toarsh's former rulers, has been dormant. At his death, the Dark Wind abandoned his empire with very little explanation of why or how he was able to pull off such a unique and seemingly impossible feat. The Dark Wind's next job was to become the leader of a city called Toarsh which had suffered a colossal attack from a powerful military force. When the Dark Wind arrived at the now destroyed Toarsh, he expected to find chaos, destruction, and victory for himself. He was not mistaken. The city had been laid to waste by the invaders, leaving just a few scattered survivors behind to rot. The Dark Wind built his own army with the remaining remnants of the city's citizens and forged his own empire. The Dark Wind had a simple plan for his people: supremacy in the world. The Dark Wind was a powerful wizard who knew that he could make the world his own, so he began his journey to accomplish just that. He was successful; the people under his command followed his orders blindly, and his army became feared throughout the land. The Dark Wind was happy to have captured the strength and power of the Dark Wind. However

I would really love to see a lot more information in this devlog at least saying what graphics engine is being used but other than that I love everything you guys have posted about the game so far! If you speak to a believer about your frustration with their Christianity, you'll often find they have a lot to say about this quote, attributed to Jesus: "A man's foes shall be they of his own household" or, "Where two or three come together in My name there I am in the midst of them." The believers I've spoken with about this passage tend to cite it this way: "If you get these two things right, then you've got a great chance of bringing others into the fold." The problem with this interpretation is that it ignores the evidence of history, and it's actually the opposite of the truth. In order to better understand what is really going on in the believer's mind, I examined the history of their understanding of the saying. During the time of Jesus, homes in the ancient world were not all that different than they are today—most people lived in simple houses made of mud and thatch, with a single room and a door. People went about their daily lives, from their homes to their jobs, while others in their towns or in other cities did the same—they spoke to each other face-to-face. They hung around other people, ate and drank together, and loved

What's new:

: This report might sound like a standard fan letter. And like many of the others you've read, it may also be a little bit long (along with the "humor"). It is not directed at someone or something, but rather at a fellow GameFanger. You know what I mean, true friends use brainpower in battle. Dear Friends, I'm writing to you today to tell you that I'm playing through the sequel to the game with whom I first started out playing games back when I was a young child. It was the game you all probably remember from the American Dream Tournament back in 2002. The game is called "America's Game" and was released by a company known as Midway. The game starts off with a simple story of a man going to work each day and hanging out with his friends after work. His friends would then, by using items they found online, compete to be the winner of one of six spots on the President's better-than-in-real-life football team. It was a fun and addictive game to play, with games that looked like a combination of MTV's Jackass and Goathing. The game seems like it is a system intended to kill people, but it turned out to be just a bit different, with a lot of subtleties and monsters. Anyway, as I stated, the game starts off small and sweet. The game is a little basic, but still easy to get your hands dirty with. The ideas are good, but not nearly as good as the earlier versions of the game. When I first started playing the game, I was playing for a friend and essentially spent the entire game competing against myself. I started winning every game, and I started winning actually paying games, but there were some things that were missing...and a couple things that were worse. I wrote to Midway not too long ago when the game first launched on GFWL in an attempt to make them aware of a few problems with some of the updates. As a result, my points were frozen for a while (Which is standard procedure for incidents like this). But as of this week, my teammates and I are competing for real-time glory again! It's a wonderful feeling. The biggest problem I've had playing this game is that up until now I've

never played against Midway. I didn't have to wait very long, as for the last year and a half, Midway has been very active with updates to the various games
