A year has passed, and the cursed town of Fairview has fallen silent. All is gone, save a handful of survivors that wander the labyrinth of abandoned corridors. With no hope of returning to their former lives, the few survivors will do all they can to make it through the day, looking for something that is no longer there. But what will happen once their fragile existence is jeopardized? Ossuary is an innovative Metroidvania with a unique twist – players must use their actions to solve puzzles and manipulate environment objects to make their way through the dark and dangerous town of Fairview. Based on a first-person point-and-click adventure developed by small developers, Ossuary looks to bring gamers a fresh experience in an increasingly cramped genre. Check out the Announcement Trailer: To celebrate the announcement, we're holding a small pre-release sale (all digital versions) from now until the 24th of November: The pre-release price is $9.99 (regular $14.99). A discount will be granted if you pre-order on GOG.com This discount will also apply to our Steam launch. If you have any questions, comments or concerns, please feel free to contact us on Facebook or Twitter. On the 21st of November, we will release the full version of Ossuary to digital stores, followed by the XBLA and PSN versions on the 22nd. Thanks for your support! Ossuary is a handmade game. All of the assets are included and created by the team, with the assistance of the artists as we expand and develop, without any use of pre-made assets or crowdfunding. The game takes place in a small town in 1950, where a massive forest fire is moving towards the town. Due to the fire the people in the town have to evacuate. The road to the nearby town of Sternberg is closed and a safe distance must be kept from the growing fire. The rescue team leaves and you, an adventurous driver must find a way out of the forest to find help. It's a driving vehicle adventure game, where the location changes from time to time. In between each location there are encounters with local dangers, like cult members, looters or wild fires. Every time you find a new road. A driving game set in a forgotten town, with a sinister atmosphere. Find a way out. You must be careful with your surroundings and don't become one of the cult members. You must overcome the forest fire to find the nearest road and then make it to Sternberg. Time is running out. A driving game built for room scale VR. A small town lays under siege from mysterious cult members and desperados looting the place. The Chief of Police sits at home, wondering if he can help the people of the town. Look around for paranormal and surreal. Be careful. Something creepy lurks in the woods, looters try to steal things and cult members worship the fire. Make your way through the woods and find a safe and sound path to Sternberg. A vicious battle is brewing for control of the city. They'll come after you. You're on your own. Make it out of this hellhole. This is a terrible game!I recommend to all users DO NOT BUY This!!! The beta version is much worse than the final product. It's buggy as hell! The final product was promised for the end of May. This game has still NOT BEEN RELEASED!!! Because this is a beta version of the game! KINDLY, KINDLY, KINDLY... PLEASE..... WAIT for the official release. This is terrible. I couldn't even beat the first level. It didn't make any sense. The control was horrible. The vehicles didn't work properly. I don't know how anyone could think this game is worth playing. A small town lays under siege from mysterious cult members and desperados looting the place. The Chief of Police sits at home, wondering if he can help the people of the town. Look around for paranormal and surreal. Be careful. Something creepy c9d1549cdd

------------------------------ Epic Little War Game is a turn-based tactics game with an overabundance of well-designed features, tight gameplay mechanics, and solid art style. ------------------------------ The little structure has nine chapters. As you win more points in the epics, you'll level up, unlock new features, and earn medals of honour. There are multiplayer and single-player campaigns, and a range of online and locally-hosted multiplayer modes. Epic Little War Game can be easily described by two main factors - a solid and simple interface and tight game mechanics. Epic Little War Game primarily plays out in your standard turn-based manner, but there are several key features that add to the depth of gameplay that you'll notice early on. Troop management is the first feature you'll notice. As you unlock more units and let them perform specific actions, it takes some of the stress away from having to manage a large fleet of troops. In addition, there are several ways to call your troops, making management of your troops very straightforward. On-screen text is another key feature. Whether it's the banners and combat text that unfolds as you play, or the in-game website that details you current standing, there's a lot to manage, making Epic Little War Game a huge time-sink that doesn't feel tedious. The battles themselves are turn-based, and there are five different battle scenarios to choose from. Four of the battle scenarios are based on standard, known battle tactics. The fifth is unique, and can be unlocked by reaching a certain score total. As it's the fifth scenario, there's a lot going on, and it's a lot to manage. But it's a lot of fun when you pull it off. The online and network functions of the game are also well-implemented, and again, simple to use. The network plays pretty well, for as long as you have the right mods installed. The online co-operative play and PVP are an absolute blast, and will keep you coming back to the game. Looking at the range of local-hosted multiplayer modes, Epic Little War Game is perhaps the ultimate war game. Epic Little War Game also features a campaign mode. As you play through different epics, you unlock more features, new units, and medals of honour. I hope you enjoy Epic Little War Game. Thanks for all your support and feedback! ------------------------------------ Game Concept: ------------------------------------

I'm using Zend Framework 1.3 for the application but I'm not using it's caching feature. The tables I'm using are: views taxes inventory If I visit two different parts of the application that contains these tables I've noticed that they result in: 1 query for each table The "views" table is updated everytime the page is refreshed. The "taxes" table is updated every time a product is purchased. The "inventory" table is updated everytime a product goes into an out of stock. That is why it's being cached. I've tried to cache the tables: Cache::remember('taxes', 60, function() { return $this->db->fetchAll('SELECT taxabook.tax_code AS test FROM taxabook, product WHERE product.id = taxabook.product_id AND product.enabled = 1 AND taxabook.code = '.$this->taxes['products_by_tax']); }); I've tried to put them in a single line: Cache::remember('taxes, inventory, views', 60, function() { return $this->db->fetchAll('SELECT taxabook.tax_code AS test FROM taxabook, product WHERE product.id = taxabook.product_id AND product.enabled = 1 AND taxabook.code = '.$this->taxes['products_by_tax']); }); And it doesn't make a difference.
