Photoshop CS6 Adobe Photoshop CC 2015; Creative Cloud Certified; \$699 The latest version of Photoshop includes a number of new features, including GPU-accelerated editing and rendering, content aware fills, redesigned workflow and UI, and additional options for working with text and objects. Adobe says the new features are fast and simple to use. "With Photoshop CC, you can experience the speed and fluidity of real-time rendering with powerful GPU rendering and now we've taken it one step further by automatically accelerating content-aware features such as intelligent cloning, noise removal, and auto-tone curves. Photoshop's new GPU-accelerated features also work with both new and legacy content-aware filters," the press release says. Content aware fills and intelligent cloning work with any raster file, including SVG, vector formats and image files that have been converted to raster format. Content aware fill overlays are just like traditional fill overlays, but they make intelligent decisions on whether or not to fill areas based on content in the image, such as if there is anything on the image that matches the fill color. The new Content Aware Fill dialog box has a control for previewing how the fill would look if it was applied to the image, and there are additional sliders and controls that enable fine-tuning the output. Adobe has also added a Content Aware Fill "actions panel," which can be accessed via the history brush or from the FILL command. When the new actions panel is selected, it is now possible to apply Content Aware Fill directly from the Brush Panel's History Brush. Content Aware Fill offers a variety of new actions and brushes that enable users to easily and precisely apply fill, textures, and other effects to photographs and artwork, and there are also new "channel grouping" options for grouping channels and layers together for faster work. Workflow and UI has been redesigned for Photoshop CC, and users now have a new Live tools workspace that enables real-time preview of tools. There is also a new panel with all Photoshop's built-in tools, including the Eraser, Healing Brush, Lasso, Mask, Paint Bucket, Selection, Spot Healing Brush, and the Trash Can. The new Workspace panels make it possible to display all the tools and settings in Photoshop's different tool options directly above the workspace, and panels can be configured as side or floating panels.

Thankfully, there are some alternatives to Photoshop that make editing images or creating new images more comfortable and convenient than Photoshop. In this post, we cover 25 web-based alternative tools to Photoshop which you can choose for your editing needs: 1. GIMP What's good about GIMP? It's a free alternative to Photoshop, but it's not powerful enough to be considered an alternative to Photoshop. It's ideal for those who need to edit images but do not have the budget to own a copy of Photoshop. GIMP is not an image editor, but an image viewer and basic manipulation tool. 2. Pixelmator If you're looking for a web-based alternative to Photoshop, we recommend Pixelmator. It can perform basic editing tasks like resizing, cropping, and rotating an image. 3. The world is in chaos, and the only movie I watched during Christmas was Mad Max: Fury Road, a dystopian, post-apocalyptic action film. This cinematic experience was almost able to distract my brain from issues of immigration, neo-Nazi marches, and the rise of the far right. Mad Max: Fury Road is the latest entry in the Mad Max franchise. My work colleague James Cameron and I are both fans of the first Mad Max film, The Road Warrior. A long time ago, in another world, we would have been proud to call ourselves Max fans. Mad Max: Fury Road is the most spectacular and visually stimulating sequel ever. Not only does Max have a much larger role in this sequel, but he's surrounded by several heroes, and even if you don't give a damn about these characters, the action is non-stop. Just when you think the story is getting too predictable, it throws in a shocking twist. What I liked the most about the story is that it puts the viewer in the position of Max. Just as Max is a refugee from a hostile environment and becomes the nomad of the Australian outback, the audience is also a refugee from modern life and its oppressive, fascist ideals. An isolated, self-sufficient society functions in self-survival mode, and while Max might be surrounded by people, the audience is abandoned to fend for themselves in an oppressive environment. The story is all about Max and his quest to reach the oasis of a strange, clean, and peaceful world. This concept gives the viewer an unparalleled escape from reality. For those who have survived, it's a chance to escape the endless, turbulent chaos of this mad world. Reaching this oasis is also about being able to escape from the fascist ideal of the modern world. In the wasteland, the only law is survival, and this is the only way we will become free from the mass conformity of the world. The ideological message of Mad Max: Fury Road is in essence: People should be free to build a safe environment. The film certainly presents a utopian society. Unlike the unbridled violence of the streets, this society is characterized by the presence of a peaceful, harmonious society based on a libertarian (the opposite of authoritarian) political philosophy. People are free to be who they want to be, and the only laws are those that are necessary for everyone to follow. The world of Mad Max: Fury Road is

October 2011 The Board of Directors of the National Association for Stock Car Auto Racing (NASCAR) released a statement Friday calling for the cancellation of the Daytona 500 in light of the ongoing economic problems that have come to a head in the past two weeks. "NASCAR's success since its inception has been based on its ability to attract sponsorship and entertainment dollars into the sport at all levels," NASCAR Chairman Brian France said. "In a perfect world, we would have a promoter or sponsor for the Daytona 500 and other events in 2013. However, the economic circumstances have been such that any promoter or sponsor who becomes tied up with NASCAR at this time will be at great risk for themselves and those depend on the sponsor's success. "While we regret to cancel this year's race, at this time there is no viable promoter to replace the Daytona 500. It is not feasible for NASCAR to extend the race into February as we did for several years. We have spent a great deal of time with our business partners and promoters over the past few weeks trying to find a solution to this very challenging situation. However, because of the current cash flow crisis we don't see a viable alternative. "NASCAR's auto racing series generate over \$120 million of economic impact for the state of Florida each year, with approximately 5,000 full-time jobs and over \$4 billion of annual economic impact to the state of Florida. These sponsors and promoters also contribute to local charities and communities where their race facilities are located, including sponsoring hospitals and schools. "NASCAR, through its sanctioning partners, is committed to the long-term health of the sport and the communities it serves. In order to continue to provide an economically viable and healthy auto racing series, it was necessary to cancel the 2013 Daytona 500. While the cancellation of this year's race is disappointing, it will provide a needed strategic planning opportunity for NASCAR and the major NASCAR-sanctioned racing series to better assess future growth. We realize our fans and other race fans have questions about this year's cancellation. However, we are confident this action will give us the chance to be better positioned to manage this important component of NASCAR's racing schedule in the future. We sincerely apologize to the fans, the partners and community that have made the Daytona 500 a significant part of this sport. "NASCAR is doing everything possible to ensure the safety of our fans and we are working closely with our security
