The move to the cloud has made its way to automated service-based solutions, which are very efficient and easy to use. Roboform, an innovative company on the service-based security industry, has released RoboForm AutoFill Cloud, an automated online service that simplifies the process of logging into your accounts in multiple accounts. AutoFill Cloud gives you a powerful password manager that will help you take on big tasks and split them into smaller jobs that give you the flexibility you need. This service saves time and makes access to your accounts available to every device you use. What does RoboForm AutoFill Cloud do? The RoboForm team has created an application that lets you login into multiple accounts and automatically logs in. This eliminates the task of remembering different logins for each account, leaving you the time to focus on other things. For example, this service lets you set up your main Facebook, Instagram, and Twitter account as a single Facebook login. The aim is to make it easy for you to access all your accounts on all devices by doing one thing. How do I login automatically? You can login to your accounts in several steps. The first thing you'll need to do is create a RoboForm account. Using this service, the RoboForm team automatically takes care of this by assigning you a secure RoboForm account. You can link any mobile apps to this RoboForm account and your accounts. After that, you'll need to add the RoboForm AutoFill Cloud service on your account. The application then asks you to choose one account to make a VPN connection to: In case this is your only account or has only one login, you'll simply need to answer YES when asked. You'll be asked to enter your name and surname, and to confirm that you want this application to access your information from this device only. You'll then be asked to enter your password on each of the selected accounts and the page will ask you to choose which account to save all the credentials of. Once this is complete, you'll find that your accounts are online in the RoboForm tab on the Facebook or Google chrome shortcut. As soon as you log in for the first time, you'll be able to connect the apps in which you have linked to your RoboForm account. You'll see your accounts listed on the RoboForm application. Each account is presented in the format of a single login and has a
