peck: Up & Down - Elektro
Instrumental Piano, For
Miles.After putting out one
of the best records of the
year, Man of Steel (the
film, not the album), I
don't know if I'll ever feel

the need to see the Superman origin story in theatres again. Maybe in four years, when the halo effect is gone, and there's a new face and some new stories to relate to. But if I'm being honest, I'd rather have fresh legs to walk on for Man of Steel 2.

While I haven't been completely unimpressed, I think I can clearly say that no movie or comic book shall ever be more relevant to my own life (in a negative way, as in the Superman comics were a boy's first introduction to the idea of having super

powers) than the
"Greatest Story Ever
Told". The more I've seen
of the Man of Steel, the
more I've heard about that
little girl from Kansas.
Samuel L Jackson's dreary
voiceover aside, the
Superman I'm seeing on
screen is loving and active

and hopeful, a Superman for the dark days of this bleak winter. He's got a go-getter attitude, although he's got a few problems when it comes to making a decision. But his instinct is clearly to take action, and with good reason: someone's trying to

destroy him. Clark's in this for the long game, so he sets out to track down this guy across the frontier from Smallville. And while this is probably my favourite Superman movie to date (the 3rd dimension has a complex relationship to my life as of late), I

can't help but notice that it's also most in touch with the comic book I loved to read as a kid. It's not just because of the Kryptonian flying boy and all the references to his birth (you just know where this is going) or his age, or his not wearing a cape. It's

the story and the
execution. Spoiler alert for
Man of Steel, because I
haven't seen it yet and I'm
sure you're wondering
