Binding CheckBox with @Value.equals(java.lang.Boolean.TRUE) I have a problem with the data binding. I have a field of type boolean and I need to bind my checkbox to this field. I tried to perform this the following way. A requirementBean has a boolean property @ManagedBean @SessionScoped public class RequirementBean { public boolean performed; } And a requirement using this bean is generated. My problem is that I get all values of the RequirementBean property and not just the checked one. @ManagedBean @SessionScoped public class RequirementMng { private RequirementBean requirement; @PostConstruct public void init() { requirement = RequirementUtils.getRequirement(getManagedObject()); } public boolean performedOnCheckbox(ActionEvent e){ //getRequirement.performed = e.getComponent().isSelected(); requirement.performed = e.getComponent().is
