## WPV XAP Deployer 1.6.rar REPACK

WPV XAP Deployer Tool: download it here What should I do? . test keys worked with jdk 1.6.0\_25 (x86) so I used notepad++, edited it to 1.7.0 (x86), tried . zip, .exe etc with no luck. I am using windows 7 64 bit. I checked that it contains two .sh files and I put them in my path. What's wrong here? I'm new to programming and I don't see what's wrong with this, what can I do I would recommend using the Debian tools to deploy applications to machines. It allows you to set the environment to run the application you are using by default, or to configure the application to be deployed to a specific computer.
