**##VERIFIED##**

---

for large datasets you can define the search criteria for points of interest and exclude others. you can also select a small number of users and define the search parameters for each user. when you start your search, you will get summary results such as the number of users, number of records, total area, density, etc. you can have the search results on a map or in a list. you can join all the results into a single list or display a separate list for each user. alternatively, you can limit the search to a single user and get results for that user only. the internal format of the points of interest is user-defined. the data provider can also provide a zipped text file or

---

extractor for that data. you can get more information about the location and history of units and over 1.5 million visitors to the site each month, including annual christmas count-backs. it was launched in 1990 as the first map-based web tool, and has evolved into the world's most comprehensive and highly-regarded unit location map database. millions of units located worldwide are currently represented in over 100 collections of data including still photographs, colour images, satellite imagery and detailed lists of awards and citations. their loved ones can contribute photographs and other evidence of life in a smaller village. it has more than 3,500 units

---

registered in 42 collections across the uk, ireland, sweden, netherlands, france and the rest of europe. when you create a community, you do more than claim ownership of your community. you can organize community activities, generate new skills and stimulate a sense of belonging in a community. how it works
