the alien has a basic means of movement, however it must find a source of fuel to do so. fuel can be found in the form of human corpses, which can be dragged and thrown around, or synthetics, which can be used to perform a thrust or grapple move. as the alien cannot swim, it must find a source of water, or 'harvest' to do so. this can be found in the form of bio-filters, aquanauts, dolphin pods, or synthetic lifeforms. additionally, the alien can use 'harvest' to enter the bio-filter, where it will be healed and energised for movement. the xenomorph is similarly a fairly weak melee-based monster. unlike the predator, however, it doesn't have a brutal melee attack or two. the xenomorph's most common attack is the slash attack, which is a swipe attack that does a good amount of damage, and then they have the heavy bite, which deals more damage with a longer attack time. additionally, there's the cock-knife, which is a curved knife attack that can be used to stun and move a marine or other object, and the alien can also fire its acidic blood. sonic, the game's mascot, was shown in a cutscene in aliens . he is shown to be an alien hunter, and the enemies of the xenomorphs. sonic is a by-product of the human transformation into an alien, and can be either good or evil depending on the side he's on. sonic is shown to be a hunter of the xenomorphs and is even seen destroying a xenomorph in a cutscene. the game is highly regarded for its survival horror elements, and in particular for its superb sound effects. there are many sound effects that the team recorded, particularly of the alien's head moving. these sound effects were originally intended to be included in the game, but were cut due to time constraints, thus making the game's scary moments less effective.

heading down the main corridor of the pyramid, rookie reaches the room containing the alien queen, only to find that it is already awake and has begun harvesting the queen's blood cells. the queen attacks rookie, who is forced to fight the xenomorph with his head, as the only place he can escape is via the ventilation shaft. after a brutal battle, rookie defeats the xenomorph and is able to kill it. he then flees the pyramid before the queen can kill him. despite having almost died in the battle, rookie is still alive and is taken to the dropship cyclops, which has been in orbit over the colony since the battle. he is confronted by a hive on the dropship and is forced to fight

the aliens. after this, rookie is transferred to the weyland-yutani prison, where he and the marines discover the remaining predators have been converted into human soldiers. the marines force them out of the colony, but the prison is destroyed before they can be taken into custody. if the player fails to kill the alien that is attacking, the predator's armor will degrade and, if the armor is completely depleted, the predator will suffer a critical hit. if the predator is killed, the xenomorph (and all other aliens) will disengage from the game, ending the mission. the player may return to the mission and attempt to eliminate any remaining aliens before the mission ends. the player has access to the hud similar to that of the original games, featuring a health meter and a rechargeable "rage meter" that, if depleted, will force the player to attack. this meter is replenished by killing aliens and xenomorphs, and can be refilled through the use of health shards. an "alien hunt meter" is displayed in the top-right corner of the hud, and is used to mark the number of xenomorphs killed. the meter disappears if it is empty; if the player survives an attack from a xenomorph, the alien hunt meter is replenished and the level is cleared. 5ec8ef588b
