## What's New in the?

After more than 3 years of work, I'm proud to release Vercors Forest, my theme, to a public preview. Vercors Forest is a theme that inspired by the beautiful scenery of my home country (France). I often find myself walking through forests, lakes, and hills of my home country, so Vercors Forest tries to reflect the beauty and tranquility of these landscapes. I also added a little theme tweaking for a fresher desktop. There are 4 new icons, a new Power plan, a task bar control applet, and more... Vercors Forest main theme features: - 2 different look : a darker look (Xmas theme) and a lighter look. - New and updated Windows icons. - A new color scheme (DarkGrey+Black) and a 3 new color scheme (White Grey Black Grey), as well as a few minor changes in the colors. - Numerous configuration settings. - Also, a fully functional and working task manager! It has a few enhancements on standard tasks. - Mp3, Rss, and P2P players have been integrated. - An included Snipping Tool. - Of course, a search tool. - A battery meter. - A configuration manager (you can define custom colors and icons for your theme). - Lots of text replacements (be sure to have a look at the settings window) - A configuration manager for keyboard shortcuts. - In previous versions, there were some noticeable bugs when exiting from the desktop with the task manager. This has been fixed. - 4 new desktop shortcut icons. - A task manager applet that displays the most used applications, as well as the battery status. - A couple of performance enhancements. - Some tweaks to the Power plan. More info about this theme: -----
