Other tracking tools like the hand tool and face tools have also been upgraded with support for 3D. "When it comes to image editing, the biggest pain point for customers is switching applications," said Nick Hogland, senior product manager with Photoshop. "While Adobe Creative Cloud members are using Photoshop as a design tool – and more and more are repurposing the same images of their projects — they can't see those images on their second computer or work on the web. This is the reason we're now enabling Photoshop and Adobe Illustrator to work in sync as one seamless workflow, enabling them to work together seamlessly with multiple collaborators and agencies without the need to switch apps to create the best, more polished assets."

Remember when Windows "Seven" was being ripped apart for its instability? Not to be outdone, Apple is throwing caution (and Windows support) to the wind in 2016. **If the rumours are true, every single version of Windows from 7 onwards, including Pro and Pro Evaluation, will be discontinued.** Microsoft didn't just discontinue 7: *it's off the road map and no longer being manufactured.* Regardless of the rumours that you'll have to pay to access Windows 7 in the future, if you have a Windows 7-based PC it's eminently worth updating to Windows 10: Windows update
